

Structural Health Monitoring Analysis Report

Generated via Artificial Neural Network (ANN) Diagnostic Engine • 2026-06-26 21:25:44

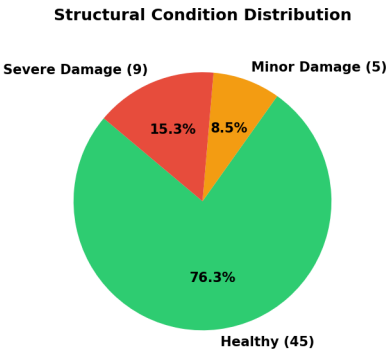

Uploaded File Name:	Sensor data for SHM.xlsx	Date of Analysis:	2026-06-26
Total Records Analyzed:	59 sensor readings	Monitoring System:	SHM-ANN v1.0

OVERALL STRUCTURAL HEALTH: HEALTHY

Prediction Confidence: 84.29%

Sensor Reading Classifications Summary

Health Condition	Sample Count	Distribution (%)
Healthy	45	76.27%
Minor Damage	5	8.47%
Severe Damage	9	15.25%
Total Readings	59	100.00%

Engineering Action Plan & Recommendations

- No significant structural damage detected.
- Continue routine inspection.

Disclaimer: This report was automatically compiled by an Artificial Neural Network model trained on sensor metrics. Results should be verified by a licensed structural engineer before implementing critical safety changes.
