

Structural Health Monitoring Analysis Report

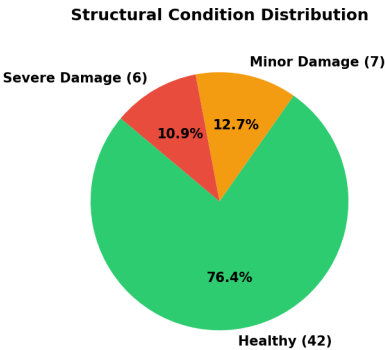

Generated via Artificial Neural Network (ANN) Diagnostic Engine • 2026-06-26 20:31:13

Uploaded File Name:	mock_sensor_batch.csv	Date of Analysis:	2026-06-26
Total Records Analyzed:	55 sensor readings	Monitoring System:	SHM-ANN v1.0

OVERALL STRUCTURAL HEALTH: HEALTHY
Prediction Confidence: 82.41%

Sensor Reading Classifications Summary

Health Condition	Sample Count	Distribution (%)
Healthy	42	76.36%
Minor Damage	7	12.73%
Severe Damage	6	10.91%
Total Readings	55	100.00%

Engineering Action Plan & Recommendations

- No significant structural damage detected.
- Continue routine inspection.

Disclaimer: This report was automatically compiled by an Artificial Neural Network model trained on sensor metrics. Results should be verified by a licensed structural engineer before implementing critical safety changes.
